

MarineVerse Cup - Competitive Sailing from your home

Virtual reality yacht racing for sailors and gamers

Wednesday 21 August 2019 - Melbourne, Australia — Full steam ahead! The team behind the award winning ‘VR Regatta’ is now offering an alpha version of MarineVerse Cup via Steam for free.

MarineVerse Cup is a competitive VR sailing game that wants to bring multiplayer yacht racing to every VR headset owner.

MarineVerse Cup is being created for both gamers who enjoy advanced simulations, and sailors who want to sharpen their racing skills off the water. The game itself is a product of years of research, development, design, and testing.

The game offers daily and weekly races, with varying wind conditions and courses that will test the players sailing and racing skills. Players will battle their way up the racing leaderboards and make friends along the way as they compete for the monthly MarineVerse Cup.

The MarineVerse team is committed to democratizing sailing. MarineVerse Cup has been designed for the latest generation of standalone VR headsets like Oculus Quest, making it easy for a casual sailor to get into virtual reality sailing.

Today’s release puts an early access build of the game into the players hands. The team is looking for community feedback and involvement to deliver a fun and authentic VR sailing experience.

MarineVerse Cup is available today on [Steam](#) and is compatible with the HTC Vive, Oculus Rift, and Windows Mixed Reality headsets.

The MarineVerse team is looking forward to meeting everyone on the water!

Greg Dziemidowicz, Lead developer, MarineVerse said: “*We’re taking everything we’ve learnt with VR Regatta and Big Breezy Boat and delivering a product that will be a foundation of eSports sailing for years to come.*”

Sanman66, MarineVerse Cup sailor said: “*MarineVerse Cup is a fantastic learning tool on sailing and tactical strategy.*”
